Dr. Boris Rotman
Department of Bacteriology and Immunology
Harvard Medical School
25 Shattuck Street
Boston 15, Massachusetts

Dear Boris:

We have about 350 reprints of your last paper. Since I imagine it would be rather difficult for you to handle the distribution yourself I would be glad to include them, as far as they go, in my own mailing just before leaving Madison. I assume that your reprints have been shipped back to Santiago and that you will have taken care of payment for that part of the number. I am enclosing a copy of a summary of my own mailing list. Please send this back to me as soon as convenient for you.

Esther is collecting a number of strains to send you as soon as conveniently possible. As you may imagine our affairs are rather disorganized. She has already mailed you W 2247. We do not know what K 12 S 4 is unless as you say it is the same as W 1317. We may be able to find a number of Lac⁻ mutants that have been developed in the constitutive W 1317.

I have forgotten your itinerary, Boris, and would appreciate your letting us know what it is. We will be away for about two weeks, in the middle of December and will leave Madison finally in the middle of January.

Yours sincerely, as ever,

Joshua Lederberg
